CAREER OBJECTIVE

Computer Science student at BRAC University with a strong foundation in problem-solving and full-stack development, and hands-on experience building and shipping independent web applications and games. Looking to apply technical skills to impactful, real-world projects while continuing to grow as a developer.

EDUCATION

BRAC University — B.Sc. in Computer Science & Engineering *Dhaka, Bangladesh*
CGPA: 3.7 | 7th Semester

Birshresto Munshi Abdur Rouf College — Higher Secondary (HSC) & Secondary (SSC) *Dhaka, Bangladesh*
Science | GPA: 5.00/5.00 (both) | HSC 2023 | SSC 2021

WORK EXPERIENCE

Director of Quality Assurance & DevOps — RootLine Lab *Oct 2026 – Present*
Website | LinkedIn

PROJECTS

MaheerOS — Interactive Developer Portfolio *Ongoing*
Live | Repository

- Built an immersive dark-room portfolio with a physics-driven swinging lamp, volumetric light, and a playable slingshot.
- Developed a browser-based desktop OS with draggable windows, 12 apps, and fully synthesized Web Audio sound effects.

Friends Forever — Friend-Group Class Routine App *Ongoing*
Live | Repository

- Built a web app for a BRAC University friend group to track and share class routines and schedules in one place.

Mars: The Last Descent — Lead Game Developer *NASA Space Apps Challenge*
Live | Repository | Demo Video

- Led development of an educational open-world sci-fi adventure exploring an infinite, Perlin-noise-generated Martian surface with a robotic companion, NOVA.
- Implemented a dynamic day/night lighting engine, procedural pixel art, and a WebAudio synthesizer engine for footsteps, thrusters, and ambient sound — all with zero external assets.
- Recreated 8 authentic historical robotic space missions (Sojourner, Opportunity, InSight, Spirit, and others) as in-world discoverable collectibles with real NASA history.

Study Rest Clock — Pomodoro-Style Timer App *Ongoing*
Live | Repository

- Built a chess-clock-style focus timer that hovers over all other apps, with a shared JavaScript core powering both an Electron desktop app and a Vercel-deployed PWA.

Cursor Trail — Chrome Extension
Repository

- Built a Manifest V3 Chrome extension with a colorful cursor particle trail and a caret-tracking effect that spawns particles while typing.

RootLine Lab — Startup Website (Frontend)
Live | Repository

- Developed the frontend for the official website of RootLine Lab, a software startup.

Stroke Prediction — Machine Learning *CSE422 Lab Project*
Repository

- Built and compared four supervised classifiers (Decision Tree, Logistic Regression, KNN, Neural Network) plus K-Means clustering on a severely imbalanced healthcare dataset (5,110 patients, 4.87% stroke rate).
- Selected Logistic Regression as the best model (AUC 0.84, recall 0.80), verified with 5-fold stratified cross-validation, after showing accuracy alone was misleading on this imbalanced data.

OPEN SOURCE CONTRIBUTIONS

Routine Genius for BRACU — Contributor *Sep 2026*

- Contributed two merged pull requests: added done buttons to the faculty and section selection lists so they close on confirmation (PR #1), and styled the inline-add done button (PR #2).

Pull Requests: PR #1 | PR #2

HONORS & AWARDS

- Bit Battles — Intra BRAC University Programming Contest: Certificate of Participation, presented by BRAC University Computer Club (Aug 2025)
- NSU Cybernaut — Datathon & Cybersecurity Competition: Participant
- GitHub Pull Shark — Achievement badge for having pull requests merged on GitHub

EXTRA-CURRICULAR ACTIVITIES

- BRAC University Chess Club — General Member, HR Department (Jul 2026 – Present)

SKILLS & OTHERS

- Technical Skills: Frontend Development (HTML, CSS, JavaScript, TypeScript, React), Backend Development (PHP, MySQL, PostgreSQL, Supabase), Machine Learning
- Competitive Programming: Codeforces rating 793 | CodeChef rating 1017 | LeetCode rating 1473
- Languages: English (Fluent), Bangla (Native)
- Interests: Coding, Problem Solving, Reading Books, Chess
