## CAREER OBJECTIVE

Computer Science & Engineering student at BRAC University with a strong foundation in problem-solving and full-stack development. Actively engaged in competitive programming across Codeforces, CodeChef, and LeetCode, with hands-on experience building and shipping independent web applications. Looking to apply technical skills to impactful, real-world projects while continuing to grow as a developer.

## PROJECTS

### MaheerOS — Interactive Developer Portfolio

Ongoing

- ◆ Built an immersive portfolio set in a dark room with a physics-driven swinging lamp, volumetric light, and a playable slingshot that fires pebbles at the light switch, bulb, and desktop icons.
- ◆ Implemented a browser-based desktop OS with draggable, minimizable windows and 12 apps (projects, skills, resume, contact, and more), plus fully synthesized Web Audio sound effects with no audio files.

### Notebook — Web-Based Drawing Application

Ongoing

- ◆ Built a browser-based drawing tool with canvas rendering, sound synthesis via the Web Audio API, and PDF export.
- ◆ Deployed on Vercel for everyone's use.

### Study Rest Clock — Pomodoro-Style Timer App

Ongoing

- ◆ Built after finding no existing app that could hover across all other applications, so developed a professional one to fill that gap.
- ◆ Developed a chess-clock-style focus timer with a shared JavaScript core powering both an Electron desktop app and a Vercel-deployed PWA.

Repository: <https://github.com/nihedevotee/study-rest-clock>

### Cursor Trail — Chrome Extension

Ongoing

- ◆ Built a Manifest V3 Chrome extension that renders a colorful particle trail following the cursor across any webpage.
- ◆ Added a caret-tracking effect that spawns particles at the text cursor while typing, working across inputs, textareas, and contentEditable fields.
